SUMMARY

Computer Science graduate specializing in AI Development and Software engineering, with a strong foundation in building scalable, data-driven systems. Experienced across the full development lifecycle — from problem analysis to deployment — with a passion for turning complex challenges into impactful solutions.

EXPERIENCE

AI Developer & Software Engineer (Co-op Intern) | KnowledgeX.sa

Mar 2025 – Aug 2025 | 6 months

- **Built an AI-powered idea evaluation system** that assesses startup concepts' market viability through guided user input and predictive scoring, enabling the company to screen incoming projects efficiently.
- **Collaborated cross-functionally** within Agile teams to translate business requirements into scalable software features across multiple projects.
- **Engaged directly with clients and stakeholders** to gather requirements and align technical solutions with their vision and business goals.

EDUCATION

Bachelor of Computer Science | Umm Al-Qura University

GPA: 3.71/4.00 | Graduated: June 2026

- **Core Skills:** AI, Machine Learning, Data Structures, and Software Engineering.

PROJECTS

Art Fraud Detection | AI & Computer Vision (NCA & Ibdaa Awarded)

Developed an award-winning ML system (NCA & Ibdaa) to detect counterfeit artworks using advanced Computer Vision. The project engineered forensic algorithms to verify authenticity discrepancies, achieving high-accuracy detection for historical and modern art pieces.

RASID Platform | Genomic Surveillance System (KFSH&RC)

Built a viral tracking platform in collaboration with KFSH&RC, integrating NCBI genomic data with interactive heatmaps. Optimized data pipelines to process complex DNA sequences (.fasta), enabling real-time surveillance and outbreak visualization.

MAWSEM | AI-Powered Seasonal Demand Forecasting (Graduation Project)

Led the end-to-end AI development of a forecasting system that analyzes seasonal demand patterns to help businesses optimize inventory and reduce overstock losses. Automated the full data pipeline from scraping to predictive modeling, delivering insights through a real-time dashboard.

CERTIFICATIONS

- **STEP English Proficiency Test** | Score: 80/100
- Artificial Intelligence Concepts & Advanced Applications | SDAIA
- Data Analysis Virtual Experience | STC & Misk Academy
- Supercharge Your Data Analytics with Generative AI | IBM

SKILLS

Languages: Python, Java, SQL, Swift

AI & Data: Machine Learning, Predictive Modeling, Data Scraping, Computer Vision

Web Development: HTML, CSS

Soft Skills: Research-to-Product Thinking, Stakeholder Communication, Problem-Solving, Cross-functional Collaboration
